# Comments for ECON115007\_2015F\_DISC GRP- STATISTICS - Lauren Hoehn

## What are the strengths of this course?

Comment
Professor Hoehn was always available to help students when they needed. She was very helpful and made the material easier to understand
Questions were always clearly explained.
Familiarity with a tool- STATA- that is extremely valuable to employers.
Learn Stata
I had never worked with Stata before this course. I thought it was a very good introduction to the program.
Left plenty of opportunity outside of class to learn
Learned Practical skills
Lauren does a good job teaching STATA. She is available for help, approachable, and generous.
The course effectively teaches the Stata program by working slowly and making sure all students are on the same page. I like the slow pace because the subject matter is very new to most students.
The final project is another strength because it applicably encompasses all the work we've done this semester.
good that it taught how to use stata
- great opportunity to learn about a software program that can be useful beyond class
Learning stata proved to be very useful

## How could the instructor improve the course?

Comment
There are no improvements that I can think of
Possibly by having more interactive material during class.
Throw some research papers at us and host a discussion about them
-
I felt that this course did not coincide with the co-req class until much later on into the semester when we started to learn about regressions.
assign more problem sets instead of just in class dropbox points
Couldn't
Nothing
The constructor could improve the course with better notes for us to follow along with. She gave us PowerPoint slides to match our Stata work but I thought they could've been more thorough.
none
- more organized in terms of class material and syllabus

## Would you recommend this course to other students, majors, etc.? Why or why not?

Comment
Yes because learning Stata is essential for anyone planning on learning statistics.
Actually yeah probs just about anyone remotely interested in numbers or relationships in the world.
Yeah stata is a good tool to learn
Yes. I thought it was very informative and helpful. It is definitely a good course for those who are Economics majors

to take.
I would recommend this course to anyone in stats
Yes very useful
Yes, Lauren is a good teacher.
I would recommend this course to other Economics majors. It is a 1 credit co-requisite for Econ Stats, so all majors must take it. I wouldn't recommend it for non-majors just because that would require taking a difficult 4-credit class as a whole.
yes, very useful course
Yes because it was interesting to see how statistical concepts taught in class can be applied in a software program
